

THE MONEY MARKET.

Table of stock market data including condensed reports for various stocks like Erie, Del. & Md., and others.

let was dull and quiet, and exercised no influence upon the home markets. The rates paid for carry-over were 3, 4, 5, 6, and 7 per cent. The Assistant Treasurer paid out \$3,300 in called bonds, and \$28,000 in coin interest. The day's business at the Gold Exchange Bank was: Gold cleared, \$56,000; Gold balances, \$1,007,854; currency balances, 1,233,254. The following were the quotations:

Table of currency and exchange rates, including Gold receipts, Currency Day, and Foreign exchange rates.

Railroad, 25; Reading Railroad, 57; Pennsylvania Railroad, 81. Gold, 116 1/2. We regret that THE TRIBUNE was misled by the foreign publication into the statement that the Port Royal Railroad Company had defaulted in the payment of interest upon its bonds. We are assured upon authority which we do not question that the interest upon the bonds of this company has always been promptly met; and from the present promising condition of the road we have no doubt that it will be promptly met in the future, and that its bonds will be redeemed at maturity.

The day's business at the U. S. Sub-Treasury covered: Gold receipts, \$2,818,151; Currency Day, \$17,500,000; Currency in gold, \$1,233,254; Currency in silver, \$1,233,254; Canceled gold certificates sent to Washington, \$1,233,254. Foreign exchange was rather easier, the standard drawers having reduced rates a day. We quote:

Table of bank and financial data, including Prime bankers' sterling bills, Gold certificates, and various bank rates.

The monetary situation underwent no change for the better, and on the other hand rates were still severer than any preceding day of the week. The opening business was done at a sixteenth, while from that it hardened to 7 per cent additional, which latter was the rate until about 2 1/2 p. m., when it softened to an eighth and interest in isolated cases, lending at 3/8 freely, a sixteenth being bid at the close. The situation shows no material change from yesterday or the last few days. The currency movement is of no material consequence, and the market is yet more or less influenced by arbitrary causes. A Washington dispatch says that the statements of the national banks of the country at the close of business on Feb. 28, show that over 300 banks were below their legal reserve. The Controller has notified the delinquent banks to make up their deficiency at once. The Treasury reports the outstanding legal tenders to-night at \$58,539,000, against \$58,487,000 last night. The internal revenue receipts, to-day, were \$1,600,000, the following were the treasury balances at the close of business: Currency, \$2,100,000; coin, \$70,500,000, of which \$25,000,000 were certificates.

United States bonds were strong, and in some cases higher prices were the rule. The 1867's sold at 112 1/2, and 68's up to 118, this class of securities improving as their position is more fully appreciated. The new 5's sold extensively at 115, currency 5's yielding to 114 1/2. Fisk & Hatch were as follows at 4 p. m.:

Table of bond market data, including U.S. Currency, U.S. Bonds, and various interest rates.

There was a steadier tone to the dealings in Tennessee bonds, and prices were higher in some cases. Tennessee rose to 80, and Missouri Sixes to 94. The Hannibal and St. Joseph issue was steady, with sales at 91 1/2. South-Carolina January and July issue was quiet, and sold at 17 1/2. The remainder of the list presented no important feature. The following were the bids:

Table of city bank stocks, including Metropolitan, People's, and various other bank shares.

And the following for city bank stocks: Metropolitan, 123 1/2; People's, 140; Citizens, 110; City Bank, 110; etc.

There was a moderate business in railroad bonds, and prices were steady. The Pacific Mortgage sold at 103 for Central, 87 1/2 for Union Firsts, 79 1/2 for Land Grant, and 75 1/2 for Indiana, the latter issues being at a decline from yesterday. The Erie mortgages are all above the line of Par, unless we except the third series, which we quote at 90 1/2. The Fourth is up to 101, and Fifth 100. There is also more inquiry for the Chesapeake and Ohio gold sixes, the road upon which the mortgage is issued being now completed from tide water to the Ohio River. Under the able management of its bankers, Messrs. Fisk & Hatch, scarcely a million and a half of the original determined loan of \$15,000,000 now remain unsold. The bonds are selling at 97 1/2 and interest. The following are the bids for railroad bonds:

Table of railroad bond bids, including Erie, Chesapeake and Ohio, and other railroad securities.

The bonds are selling at 97 1/2 and interest. The following are the bids for railroad bonds:

Table of railroad bond bids, including Erie, Chesapeake and Ohio, and other railroad securities.

The purchase of the Treasury gold, yesterday, by the banking-house of Jay Cooke & Co., leading members of the syndicate, in that it was thought to foreshadow a reduction of gold sales by the Treasury next month, even if not an expansion of the legal tender, was made the occasion of some heavy purchases of gold by some of the pool members, to-day, with an eventual result of advancing the price to 116 1/2, the average of the price being 116 1/2 and 116 1/2, the London market being 116 1/2 and 116 1/2.
